

C&D Hex Caps

REFRIGERANT HEX CAPS

C&D Valve's 1/4" Red Anodized Aluminum Refrigerant Hex Caps are durable and reliable for sealing standard SAE flare service ports. Available in 6 or 10 pack quantities, these high-visibility caps are easy to install with a wrench and help protect against refrigerant leaks and contamination.

Key Features:

- **Universal Fit:** 1/4" Hex caps fit standard 1/4" SAE flare service ports.
- **Robust Construction:** Crafted from high-quality materials to withstand harsh environmental conditions.
- **Secure Design:** Helps prevent refrigerant leaks and contamination.
- **Easy Installation:** User-friendly hex head allows for easy wrench tightening in the field.
- **Quick Identification:** Bright Red anodized aluminum metal improves visibility and identification.

Choose C&D Valve's Refrigerant Hex Caps for a reliable solution that safeguards your HVACR systems with confidence.

Malco reserves the right to adjust order quantities and ship dates for orders due to high demand for this launch. Please contact our customer support team with any questions.
